

# WANDER LAND

Each month, we ask interior design talents to guest-edit the style cues for home to adopt now. For November, Yasmine Ghoniem of YSG Studio embraces wanderlust, where her collector's eye draws together seemingly disparate elements in a rich mix.

**"INTRODUCING THE JET-SET** vagabond lifestyle, where the romance of travel is back with a vengeance. All paths lead to remote islands lapping up bacchanalian bohemia and wild new frontiers where free-spirited adventure soars. Make your home a global mix of layered holiday memories, so we can cling on to that feeling of freedom eternally. No one and nothing rules, except love."

**Souvenir spirit**  
 "The cult of personality reigns supreme – it's all about improvisation, shapeshifting to reinvent looks, and even the functions of select pieces and spaces. Colours seep into walls and tile-clad tabletops, scarves and vintage fabrics fashion lampshades, and retro finds are the new necessity because they stir your soul."
